

GE Spurs Product Innovation Through Multi-Year Agreement With ANSYS

February 20, 2018

PITTSBURGH, Feb. 20, 2018 /PRNewswire/ -- [General Electric Co.](#) is leveraging [ANSYS](#) (NASDAQ: ANSS) Pervasive Engineering Simulation™ to accelerate product development and analysis, improve product quality and reduce testing time in aviation and power generation applications. Through a new, multi-year agreement, GE will realize greater cost and time savings during product development.

image

The agreement provides GE access to the full breadth of ANSYS' industry-leading portfolio of engineering simulation software and experts, to enable multiphysics solutions in ground-based and on-wing gas turbine engines. As part of the agreement, GE and ANSYS formed an Executive Management Review Board to collaborate and drive innovation on areas of mutual interest.

"Growing GE's relationship with ANSYS is intended to help us better focus on innovation through our core competencies," said Gary Mercer, vice president of engineering, GE Aviation. "We are eager to explore and apply ANSYS' innovative design solutions earlier in the design process."

"ANSYS is committed to driving Pervasive Engineering Simulation and to providing engineers with the tools needed to transform design, manufacturing, operations and product development," said Ajei Gopal, CEO, ANSYS. "With ANSYS technology further integrated into GE's engineering process, we can take our 30-year collaboration to the next level of strategic partnership, and enable ANSYS and GE to better drive innovation."

About ANSYS, Inc.

If you've ever seen a rocket launch, flown on an airplane, driven a car, used a computer, touched a mobile device, crossed a bridge, or put on wearable technology, chances are you've used a product where ANSYS software played a critical role in its creation. ANSYS is the global leader in Pervasive Engineering Simulation. We help the world's most innovative companies deliver radically better products to their customers. By offering the best and broadest portfolio of engineering simulation software, we help them solve the most complex design challenges and create products limited only by imagination. Founded in 1970, ANSYS employs thousands of professionals, many of whom are expert M.S. and Ph.D.-level engineers in finite element analysis, computational fluid dynamics, electronics, semiconductors, embedded software and design optimization. Headquartered south of Pittsburgh, Pennsylvania, U.S.A., ANSYS has more than 75 strategic sales locations throughout the world with a network of channel partners in 40+ countries. Visit www.ansys.com for more information.
